

ASTM CERTIFICATION

July 10, 2014

Anderson Bremer Paper Co. (ABP), procured corrugated products meet or exceed all of the requirements for ASTM D-4727, the manufacturing of board for domestic use. Our liners and mediums are checked to TAPPI T-410 for basis weight and T-411 for caliper. ABP uses standard fluting sizes and our adhesives meet commercially accepted standards. The combined board meets the requirements for burst under TAPPI T-810 and for ECT under TAPPI T-939 and finished products meet the requirements of Rule 41 / item 222.

ABP procured corrugated products are manufactured to ASTM D-5118 using the board made meeting ASTM D-4727 and above. The boxes meet requirements for joint size and adhesive type used for the joint. Representative samples of all corrugated products are tested for both Burst and ECT and boxes are labeled with a standard Box Maker's Certificate as appropriate.
